VOLUME CONTENTS

Number 1

D. E. Calkins, R. P. Kaiser and H. S. Kim	1	Analytical and Physical Modeling of a Free-Fall Oceanographic Vehicle
S. K. Chakrabarti and R. A. Naftzger	49	Wave Forces on Hemicylinders
R. Latorre and S. Ryan	71	Dimensional and Similitude Analysis of Spray Blister Sheet from Prismatic Planing Models
R. S. Langley	85	Random Dynamic Analysis of Towed Pipelines
K. Szilder and E. P. Lozowski	99	Optimizing the Growth Thermodynamics of Artificial Floating Ice Platforms

Number 2

M. E. McCormick and R. Bhattacharyya	117	Editorial—What is the Value of a Technical Journal?
D. Myrhaug and O. H. Slaattelid	119	Combined Wave and Current Boundary Layer Model for Fixed Rough Seabeds
T. N. Delmer and T. C. Stephens	143	Numerical Simulation of an Oscillating Towed Weight
M. J. Tucker	173	Interpreting Directional Data from Large Pitch–Roll–Heave Buoys
V. Sundar and K. Subbiah	193	Application of Double Bounded Probability Density Function for Analysis of Ocean Waves
Technical Note		
Y. F. Al-Obaid	201	Flow Induced Oscillation of Circular Objects
Books Received	207	
Book Review	209	
News and Notices	211	

Number 3

M. E. McCormick and R. Bhattacharyya	215	Obituary
A. N. Williams and A. G. Abul-Azm	217	Hydrodynamic Interactions in Floating Cylinder Arrays—II. Wave Radiation
Yung-Hsiang Chen and Fu-Ming Lin	265	General Drag-Force Linearization for Nonlinear Analysis of Marine Risers
R. Eatock Taylor and P. Sincock	281	Wave Upwelling Effects in TLP and Semisubmersible Structures
H. T. Low, Y. T. Chew and K. T. Tan	307	Fluid Forces on a Cylinder Oscillating in Line with a Uniform Flow
Technical Note		
R. E. Salomon	319	Rocking Buoy Wave Energy Converter
Book Review	325	

Number 4

Chih-Kang Lee and J. Y. K. Lou	327	The Hydroelastic Effects on Three-Dimensional Structural Dynamics
S. Neelamani, V. Sundar and C. P. Vendhan	343	Dynamic Pressure Distribution on a Cylinder Due to Wave Diffraction
G. R. Cook and E. Simiu	355	Hydrodynamic Forces on Vertical Cylinders and the Lighthill Correction
S. K. Chakrabarti	373	Approximate Methods in Short-Term Wave Response Distribution
A. N. Williams and W. G. McDougal	401	Hydrodynamic Analysis of Variable Draft Spiral Wavemaker
M. R. Haddara and P. Bennett	411	A Study of the Angle Dependence of Roll Damping Moment
Book Review	429	

Number 5/6

A. Campanile and P. Cassella	431	Form Stability Reduction Among Waves for Series 60 Hulls
W. Sulisz, W. G. McDougal and C. K. Sollitt	463	Wave Interaction with Rubble Toe Protection
K. H. Kwik	475	Calculation of Ship Collision Avoidance Manoeuvres: a Simplified Approach
S. Wongngernyuang and R. Latorre	493	Development of Ship Course Stability Diagrams for Deep and Shallow Water with the Influence of Trim
J. Allender, T. Audunson, S. F. Barstow, S. Bjerken, H. E. Krogstad, P. Steinbakke, L. Vartdal, L. E. Borgman and C. Graham	505	The WADIC Project: a Comprehensive Field Evaluation of Directional Wave Instrumentation
M. Greenhow	537	A Probability Distribution of Breaking Wave Crest Height Based on a Crest-acceleration Threshold Method
C. Y. Liaw, N. J. Shankar and K. S. Chua	545	Large Motion Analysis of Compliant Structures Using Euler Parameters
Technical Note *M. Rahman*	559	Multiple Scattering of Surface Waves in Cylinder Arrays
Technical Note *P. F. Hamblin, J. A. Bull and F. Chiocchio*	567	Field Evaluation of a Microprocessor-based Recording Current Meter Modified for Wave Research
P. A. A. Laura	577	Letter to the Editor
Book Review	579	
Books Received	583	
News and Notices	585	
Volume 16 Title Section, Contents and Author Index	i
